

## SPEAKERS' & PANELLISTS' PROFILES

**Catherine Weetman, MSc, FCILT**

***Director, Re-think Solutions, Visiting Fellow, The Business School, University of Huddersfield and Vice-Chair, Environment and Sustainability Forum, Chartered Institute of Logistics UK***

Catherine has over 25 years' experience in contract logistics, manufacturing, retail, and supply chain consultancy, including roles at Tesco, Kellogg's and Exel/DHL Supply Chain. She has specialist knowledge of supply chain design and risk, project management, sustainable business models, and demand forecasting. She founded Re-think Solutions to 'make sense of sustainability' for businesses. She provides food for thought, raising awareness of the sustainability-related risks and issues facing businesses today. She shares her research on the emerging, more sustainable, business models, and how supply chains will evolve to support these – best practice for sustainable supply chains.

**Monique Towner**

***Managing Director, SheQ Improvement Solutions Limited & Director, Environment 4 Logistics Limited***

Monique spent 12 years managing BS5750, in turn ISO9001 and quality management systems, before joining the British Standards Institution (BSI). Conducting 3rd party audits for ISO9001, ISO14001, BS OHSAS18001 quickly became a way of life across a wide range of industries, including logistics. In 2006, Monique set up her own consultancy to help companies develop and continually improve their management systems. ISO system work over the past 8 years has predominantly been in relation to ISO14001, supporting companies such as Sainsbury's and DHL in their quest for environmental excellence.

**Morag White**

***Field Consultant, Transport and Travel Research Ltd & Director, Environment 4 Logistics***

Morag was previously Sainsbury's Logistics Environment Manager, dealing with issues ranging from environmental performance and reporting, designing and implementing the EMS for the Logistics function and has worked on projects to improve depot efficiency, such as waste management and legal compliance. Morag has also spent time working with outside organisations to help progress the environmental agenda, including Freight Transport Association, IEMA and the Environment Agency. Morag's particular specialism is working with distribution sites to improve their environmental performance in a realistic but stretching way.

**Tilly Shaw**

***Senior Environmental Accounting Associate at Sustain Limited***

Tilly Shaw graduated in 1998 with a Physics degree from Manchester University. She spent six years as an operations manager within HSBC's investment wing, before deciding to switch to a career in sustainability. After starting out as a local authority energy advisor, Tilly moved to the Environment Agency and finally to Sustain, where she now provides consultancy for commercial enterprises on energy policy and strategy, carbon compliance, reporting and accounting systems, action planning and much more. No two projects are the same: over the past three years, Tilly has calculated whole-life carbon footprints for products as diverse as RSA insurance, Dyson hand-dryers, Kingsmill bread, Autoglass windscreens, and a multi-storey car-park.

**Liesl Ward**

***Regional Operations Director, Great Bear Distribution***

Liesl began her career in logistics with Calor Gas before moving to the Scandinavian division of P&O Ferrymasters, where she eventually became a Key Account Manager for several large customers. Whilst at P&O, Liesl completed a 4 year MBA as well as the P&O Management Development Programme. In 2003, Liesl moved to Great Bear as Transport Manager of the Unilever contract, before progressing to General Manager and then Regional Operations Director in 2013, with responsibilities for their North-West based customers for Transport, Warehouse and Co-packing operations.
